Another quality renovation by Jack Lewis of Ocean Point Construction! This is the second major renovation that Jack has completed for us. We reconfigured the kitchen moving the sink to the center of the peninsula. The greatest challenge was the navigating around the stack in the corner. Thanks to the design efforts of Tiffany Reeder of Hilton Head Kitchen Designs, we were able to add significant storage space as well as width to the kitchen moving the location of the refrigerator and stove. The kitchen cabinets are Kraftmaid with a custom color.

We also raised the ceiling in the dining room to allow for a more open feel to the unit and better view from the kitchen for the cook. This work also allowed us to add another vent into the kitchen for better airflow for heating and cooling.

Both bathrooms were remodeled with new tile, cabinets, counter tops and bathtub. The addition of LED low profile lights added much needed lighting in the bathrooms and eliminated the need for a wall lighting fixture.

Finally, to avoid traffic congestion in the hallway to the master bedroom, we replaced the door to the master closet with a barn door.
